

Maaz Bin Safeer Ahmad

185 Stevens Way, Paul G. Allen Center, Office 510, Seattle, WA 98195, USA
maazsaf@cs.washington.edu • +1 (206) 330-1940 • homes.cs.washington.edu/~maazsaf/

EDUCATION

University of Washington, Seattle, Washington, USA

Doctor of Philosophy (Ph.D.) in Computer Science & Engineering

Aug 2014 – Present

- Advised by Dr. Alvin Cheung
- Research areas: Programming Systems, Databases

National University of Computer & Emerging Sciences, Lahore, Punjab, Pakistan

Bachelor of Science (B.S.) *cum laude* in Computer Science

Aug 2010 – Jul 2014

- Thesis adviser: Dr. Kashif Zafar
- Awarded the University Silver Medal

RESEARCH

EXPERIENCE

University of Washington, Seattle, USA

Ph.D. Student in Paul Allen School of Computer Science & Engineering

Aug 2014 – Present

- Advised by Dr. Alvin Cheung
- Research areas: Program Synthesis, Compilers, DSLs
- Projects:
 - **Casper**: A compiler that uses program synthesis and verification to automatically expose data-parallelism in Java applications by transforming sequential loop nests to high-level MapReduce APIs, such as Apache Spark.
 - **MetaLift**: A framework for building compilers that target domain-specific languages (DSLs). Unlike traditional syntax-driven compilers, which rely on pre-defined rules, compiles generated using MetaLift perform *Verified Lifting* (a combination of program synthesis and verification).
 - **Poçar**: A tool that synthesizes parametric CAD models for 3D objects from a small set of example configurations.
 - **GraSSP**: A novel approach for automatic parallelization of single-pass array-processing programs with possible data-dependencies.

Adobe Research, Cambridge, USA

Jul 2017 – Dec 2017

Research Intern in Creative Technologies Lab

- Supervised by Dr. Shoaib Kamil
- Collaborators: Dr. Alvin Cheung and Dr. Jonathan Ragan-Kelley
- Research areas: Program Synthesis, Image Processing, Compilers
- Projects:
 - **Dexter**: A compiler that uses program synthesis and verification to rejuvenate legacy image-processing libraries by translating individual kernels, written in C++, to the Halide DSL.

Information Technology University, Lahore, Pakistan

Jun 2012 – Jul 2014

Research Assistant in NEWT Lab

- Advised by Dr. Umar Saif and Dr. Lakshminarayanan Subramanian
- Research areas: Computing for Development, Disease Surveillance
- Projects:
 - **DengueBreaks**: A system for early detection of dengue outbreaks in Punjab, Pakistan. It leverages alternate data sources such as online news articles to automatically generate outbreak predictions.

SOFTWARE

DEVELOPMENT EXPERIENCE

Tableau Software, Kirkland, USA

Software Engineer Intern in Data Management Team

Summer 2015

- Supervised by Dr. Spiro Michaylov and Dr. Kate Morris
- Implemented a new feature in the Tableau Data Engine to improve the incremental extract refresh process for time-window extracts.

Proton Labs, Lahore, Pakistan

Web Development Intern

Summer 2011

- Supervised by Abid Mahmood
- Worked as part of a small team to design, implement and deploy web-applications.
